

Design Technology

Design Technology at Moorfield school is an inspiring, rigorous and practical subject. Our children use their imagination and creativity to design, make and evaluate products that consider the needs of the user and solve real life problems within a variety of contexts.

Every child at Moorfield school develops essential skills and knowledge in design, structures, mechanisms, electrical control and a range of materials, including food.

We set high expectations for our children to challenge their thinking as they explore the designed world around them, allowing them to create innovative projects, of which they are extremely proud.
